J. H. W. M. P.N.P. (AMPS follow HSC)

#32

arousable -

- told to stop PCA, ^{continuous here} ~~just sat on~~
- check sat and infuse if low - asked if should cover - said no need for it -
- call at 4:00

PCA 1mg/cc in 50cc.

bolus dose 1.5mg

Q 6 min -

max 20 up / 2hrs

bi repro system was flushed -

Infusion on other site of Y

connector - 3cc s less

in pump - 36 cc left in

pump -

got 7 doses -
3 demands.

10.5mg.

10 + 6:10 Pt asleep
@ vital signs.
~~2:00~~
found her dead at 7:20.

B 4mg
100mg/4hr

Misa Lwin

9:20 in ER

Start here
←

checked by nurses btw 10 + 11:00 -
in Pain 10/10 - "unbearable"
~~area~~ screaming
stabbing pain
constant

Mother wanted an epidural, said last time it helped - M. said she will kept in ER until pain ≤ 5 .
PCA started 1mg/cc - (4 ampuls)
M. explained only LS can push button -
2mg bolus given by nurse ~~and checked~~
? none given
• the PCA used by L.S..

at btw 12:20 and 12:40 awake
~~drugs cross words~~ - in pain -
screaming - not sleepy -
• ER told to discharge pt only when PS ≤ 5 and well after PCA started - ~~even~~ After 1:00am
• M got all that LS in pain and screaming \rightarrow transfer
• next call from ward - resp ≤ 10
